Date: 9th Sep 2010

The following are pictures of the work during the months of July-Sep 2010. These have been achieved as a result for of the funds received in the past months.

All outside doors are fitted and community at work.

Side view after facia board and plastering (Current)

One of the builders is pressing or laying concrete (slab) in one of the classrooms.

Inside slab and wall plastering is done on one room. Windows will be fixed next week.

We are very thankful to God for provided the resources that have brought this project this far. You have done more than what we can tell. Our target was only to get the roof on this year but we have gone beyond that. Praise the Lord!

The children started school this week. They are very excited to see all the new changes, school building and teacher.
